TRUVADA 1 tablet daily x 30 days PO plus RALTEGRAVIR 400mg 1 tablet BID x 30 days
  a. All sexual assault patients who are eligible for HIV PEP are to be given a 7-day HIV PEP pack located in the ED Pyxis. These patients should also be HIV tested before starting HIV PEP.
  b. If the patient is pregnant please contact the HIV 24/7 hotline at 888-448-4911.
     RALTEGRAVIR is a category C medication and should only be given if the patient is high risk. Breastfeeding should stop until the patient follows up with a HIV specialist.
  c. All patients given the 7-day HIV PEP must follow with ACS and/or primary care, or OB/GYN if needed. During off hours, these patients can be placed in the follow up office for their ACS appointments.
  d. For any questions regarding PEP contact the HIV 24/7 hotline at 888-448-4911
